

Име: **Димитри Йорданов Гинев**
Катедра: История и теория на културата
Сл. телефон: +359-2-971-10-02
Факс: +359-2-870-63-26
E-mail: dimaginev@yahoo.com
Адрес: СУ "Св. Климент Охридски"
бул. "Цариградско шосе" № 125, бл. I, каб. 512
София 1113
Специалност: Културология

Изследователски интереси: история на херменевтиката, трансцедентална и херменевтична феменология, философско-политическа теология, континентална философия на науката, херменевтична философия на езика и комуникациите

Образование:

1983 Степен "Доктор" по образователните науки
1986 Диплом за завършено висше образование по философия, СУ «Св.Климент Охридски»

Научни звания: професор

1988 Хабилитация по философия

Специализации, преподавателски опит в чужбина:

2008 Гост-професор в Western Kentucky University
2003, 2006 Гост-професор в Humboldt University
2001 Гост професор в Ruhr-University of Bochum
1996 Лекционен курс в Penn State University

1998 Стипендия «Фулбрайт» към Американския католически университет
1997 University of Melbourne
1995 Center for Philosophy of Science at the University of Pittsburgh
1992 University of Duesseldorf and Humboldt University in Berlin
1990-1 Center for Philosophy of Science at the University of Pittsburgh
1987-8 University of Marburg and the University of Duesseldorf

Чужди езици: английски, немски, френски

Преподавателска дейност (последните пет години):

Трансформиране на Библейската екзегетика в секуларни теории на интерпретацията;
Херменевтични ситуации в развитието на Протестантската теология; Модерната хуманистаристика в оста на напрежение между секуларизация и де-секуларизация; Легитимационната криза на модерността в периода на обособяването на сферите на публичен в националните държави;
Съдбата на опозицията "сакрално-профанно" в модерността от гледна точка на философската херменевтика.

Други длъжности:

От 2011 Зам.-председател на комитета на домейн "Индивиди, общества, култури и здравеопазване", програма COST (Програма за Европейско сътрудничество в областта на научните и техническите изследвания)
От 2005 Член на комитета на домейн "Индивиди, общества, култури и здравеопазване", (ISCH), програма COST
От 2005 Представител на България в Програмния комитет по приоритет 8 на Седма рамкова програма (Социално-икономически и хуманитарни науки)

Научна редакторска дейност :

Участие в редколегии:

- От 1992-7 Studia Culurologica – Основател и главен редактор
От 1997 Divinatio – Основател и главен редактор
От 1991-9 Science and Education (published by KLUWER)
От 1993 Concordia
От 1993-2003 Philosophy and Rhetoric (published by Penn State University Press).
От 2001 Zeitschrift für allgemeine Wissenschaftstheorie (published by KLUWER)
От 2001-4 Maggazzino di Philosophia
От 1998 Phainomena
От 2000 Maggazzino di filosofia (published by Franco Angeli)
От 2003 Cultural Horizons (published by Brill)
От 2005 Kairos
От 2006 AnaMnesia
От 2007 Jahrbuch fuer Europaeische Philosophie (Belgrade)
От 2008 Interdisciplinary Crossroads

Членство в международни научни и професионални организации:

1. Институт за науки за културата - Северен Рейн Вестфалия – Есен, Федерална Република Германия.
2. Институт по история и философия на науката към Университет Питсбърг, САЩ.
3. Катедра по философска антропология и философия на културата на Хумболд Университет към Берлин, Федерална Република.
4. Световен институт за феноменологични изследвания, Ню Хемпшир, САЩ.

Сред публикациите:

Книги:

1. Херменевтични студии. София: Ун. изд. "Св. Кл. Охридски", 2010.
2. Постметафизични сюжети. Т. 1. София: Идея, 2009
3. Вплетеност и откритост. София: Идея, 2005.
4. Културологични студии, София: Ун. изд. „Св. Кл. Охридски”, 1995.

SELECTED AUTHORED BOOKS

Practices and Possibilities (Koenigshausen & Neumann, 2013)

This book is an attempt to link the tradition of practice theory to that of philosophical hermeneutics. During the last two decades much has been written concerning the integration of phenomenological paradigms of constitutional analysis of meaning in versions of practice theory. Several authors have stressed a symptomatic predicament in this regard. The intent to look at practices as the texture of human existence leads necessarily to forms of empirical theorizing: Practices ought to be constituted as empirical objects of inquiry – an imperative which entails a series of epistemological requirements for the structure of the respective theory. Yet if one goes on to argue that practices in their interrelatedness are the milieu in which the constitution of meaning takes place, then, granted that the constitution of meaning requires a transcendental reflection, practices are something more than (or something different from) empirical objects of inquiry. Following the standard way of coping with this predicament, one holds that empirical studies of practices are compatible with the use of contextual transcendental arguments. Several post-phenomenological traditions in sociology, psychiatry, cognitive science, human ecology, urban studies, and other disciplines have demonstrated this compatibility. Still, there is a missing link between the being of meaning (revealed phenomenologically as existentiality) and the empirical reality of practices. My major aim is to show that an interpretation of the ontological difference can provide this link. The ontological difference is read off not as a dichotomy but as interplay between the ontic and the ontological. The present study probes this construal by addressing issues like the indeterminacy of practical interpretation, the hermeneutic fore-structuring of social norms and cultural patterns, the existential spatiality of practices, and the intelligibility of practices' endogenous reflexivity.

The Tenets of Cognitive Existentialism (Ohio University Press, 2011)

„In this work Ginev proposes a reinterpretation of the basic project of science and its interpretative practices within the more fundamental relationship that humans have with the world. Building on the work of Martin Heidegger but advancing a significantly refined understanding of the hermeneutical project of science, the author engages in a serious dialogue with the most significant contemporary accounts of science from the analytic, feminist, and postmodern traditions. His original approach illustrated along the way with extended concrete examples drawn from the history of science. The result is novel and insightful contribution to major debates in the philosophy of science, especially concerning its epistemological and ontological commitments.“

Das hermeneutische Projekt (Passagen Verlag, 2011)

Der Autor rekonstruiert das hermeneutische Projekt Georg Mischs, indem er den Schwerpunkt auf einen Vergleich mit der Daseinsanalytik Heideggers und der philosophischen Hermeneutik Gadamers legt. Besondere Aufmerksamkeit schenkt der Autor dabei der Frage, inwieweit die hermeneutische Lebenslogik die spätere Dekonstruktion der logozentrischen Begrifflichkeit metaphysischer Tradition antizipiert.

Transformationen der Hermeneutik (Königshausen und Neumann, 2008)

Im Mittelpunkt dieser Studie stehen unterschiedliche Tendenzen interpretierender Selbstreflexion innerhalb wissenschaftlicher Forschungsprozesse. Das Ziel ist, diese Tendenzen in einem konstitutionstheoretischen Zusammenhang zu behandeln. Dabei untersucht die Studie drei konstitutionstheoretische Paradigmen der Forschung: den kognitiven Existenzialismus in naturwissenschaftlichen Forschungsprogrammen, die doppelte Hermeneutik in den Geisteswissenschaften und schließlich die Prototheorie in den interpretierenden Sozialwissenschaften.

Steps in Overcoming Scientism (Idea Publishing House, 2007)

In this book the steps of the hermeneutic critique of scientism are construed as steps in extending and reformulating Heidegger's existential conception of science.

The Context of Constitution. Beyond the Edge of Constitution (Boston Studies in the Philosophy of Science, Vol. 247), (Springer, 2006)

Whether philosophy of science is crucially tied down to epistemological justification is a significant topic of current debates. This book sets out an extensive argument against the foundationalist theories of justification. In developing a project of a hermeneutic context of constitution, it advocates new life for philosophy of science. At the present, there seems to be no middle ground between analytic approaches to scientific knowledge and hermeneutic conceptions of scientific research. In reacting to this situation, the author brings together aspects of the interpretative constitution of research objects and a holistic picture of science's cognitive structures. The book is conceived of as a contribution to a wide range of problems concerning the post-Gadamerian extension of philosophical hermeneutics beyond the scope of the traditional humanistic culture.

Entre Hermeneutique et Anthropologie (Peter Lang, 2004)

Entre l'ontologie herméneutique de Heidegger et l'anthropologie philosophique de Plessner se situe l'espace des possibilités de la pensée post-métaphysique. L'intérêt primordial des études recueillies dans la collection est cet espace de possibilités. Le point commun des recherches est ce que le mythe de l'émancipation ignore: la finitude et la *transcendance immanente* de l'expérience humaine. Le préfixe *post* se réfère non seulement à un mode spécialisé de philosopher comme métaphysique, mais plutôt à *l'identité métaphysique* de la modernité. L'herméneutique philosophique et l'anthropologie philosophique sont des discours pos-métaphysiques qui détiennent le potentiel critique nécessaire pour la réalisation d'une *identité post-métaphysique*.

Critique of Epistemological Reason (Bulgarian Academic Monographs, 2000)

Drawing on different versions of the constitutional analysis of meaning, this study addresses the search for new philosophical identities of science, political culture and art criticism. The book offers hermeneutic investigations of science's rationality, the dialogue which should take place in a multicultural public sphere, and the character of art criticism after the "end of art".

Essays in Hermeneutics of Science (Ashgate, 1997)

The essays in this book offer elaborations on the relationships between rhetoric and hermeneutic; naturalist and non-naturalist theories of culture; and transcendental pragmatics and hermeneutic philosophy.

A Passage to a Hermeneutic Philosophy of Science (Poznan Studies in the Philosophy of the Sciences and the Humanities, Vol. 53), (Rodopi, 1997)

In this book the author has brought together his long-standing interests in theory of scientific rationality and hermeneutic ontology by developing a hermeneutic alternative to analytic (and naturalist) epistemology of science. The “hermeneutic philosophy of science” is less the name of a new field of philosophical inquiry than a demand for a “repetition of the basic philosophical questions of science” from a hermeneutic point of view.

Die Mehrdimensionalität der geisteswissenschaftlichen Erfahrung (Blaue Eule, 1995)

Das Buch behandelt philosophisch wie wissenschaftstheoretisch grundlegende Fragen der hermeneutisch-phänomenologischen Fundierung geisteswissenschaftlicher Erfahrung. Es bietet in einem ersten Teil eine knappe Diskussion unterschiedlicher Antwortversuche, was eine Begründung dieser Erfahrung innerhalb einer Lebenswelttheorie sei. Der zweite Teil befasst sich mit der Möglichkeit der Konstituierung einer „existenzialen Kulturologie“.

Grundriß einer kritischen Wissenschaftstheorie (Peter Lang, 1989)

Der eigene Weg der transzendentalen Wissenschaftskritik erlaubt keine Berührungspunkte mit jedweder Wissenschaftstheorie naturalistischer Provenienz. Dieser Weg führt von einer Analyse der typologischen Pluralität wissenschaftlicher Erkenntnis über eine phänomenologische Analyse des wissenschaftlichen Bewußtseins zu einer Transzentalontologie, die die Grenzen der wissenschaftlichen Rationalität erschließt.

SELECTED AUTHORED BOOKS

Practices and Possibilities (Koenigshausen & Neumann, 2013)

This book is an attempt to link the tradition of practice theory to that of philosophical hermeneutics. During the last two decades much has been written concerning the integration of phenomenological paradigms of constitutional analysis of meaning in versions of practice theory. Several authors have stressed a symptomatic predicament in this regard. The intent to look at practices as the texture of human existence leads necessarily to forms of empirical theorizing: Practices ought to be constituted as empirical objects of inquiry – an imperative which entails a series of epistemological requirements for the structure of the respective theory. Yet if one goes on to argue that practices in their interrelatedness are the milieu in which the constitution of meaning takes place, then, granted that the constitution of meaning requires a transcendental reflection, practices are something more than (or something different from) empirical objects of inquiry. Following the standard way of coping with this predicament, one holds that empirical studies of practices are compatible with the use of contextual transcendental arguments. Several post-phenomenological traditions in sociology, psychiatry, cognitive science, human ecology, urban studies, and other disciplines have demonstrated this compatibility. Still, there is a missing link between the being of meaning (revealed phenomenologically as existentiality) and the empirical reality of practices. My major aim is to show that an interpretation of the ontological difference can provide this link. The ontological difference is read off not as a dichotomy but as interplay between the ontic and the ontological. The present study probes this construal by addressing issues like the indeterminacy of practical interpretation, the hermeneutic fore-structuring of social norms and cultural patterns, the existential spatiality of practices, and the intelligibility of practices' endogenous reflexivity.

The Tenets of Cognitive Existentialism (Ohio University Press, 2011)

„In this work Ginev proposes a reinterpretation of the basic project of science and its interpretative practices within the more fundamental relationship that humans have with the world. Building on the work of Martin Heidegger but advancing a significantly refined understanding of the hermeneutical project of science, the author engages in a serious dialogue with the most significant contemporary accounts of science from the analytic, feminist, and postmodern traditions. His original approach illustrated along the way with extended concrete examples drawn from the history of science. The result is novel and insightful contribution to major debates in the philosophy of science, especially concerning its epistemological and ontological commitments.“

Das hermeneutische Projekt (Passagen Verlag, 2011)

Der Autor rekonstruiert das hermeneutische Projekt Georg Mischs, indem er den Schwerpunkt auf einen Vergleich mit der Daseinsanalytik Heideggers und der philosophischen Hermeneutik Gadamers legt. Besondere Aufmerksamkeit schenkt der Autor dabei der Frage, inwieweit die hermeneutische Lebenslogik die spätere Dekonstruktion der logozentrischen Begrifflichkeit metaphysischer Tradition antizipiert.

Transformationen der Hermeneutik (Königshausen und Neumann, 2008)

Im Mittelpunkt dieser Studie stehen unterschiedliche Tendenzen interpretierender Selbstreflexion innerhalb wissenschaftlicher Forschungsprozesse. Das Ziel ist, diese Tendenzen in einem konstitutionstheoretischen Zusammenhang zu behandeln. Dabei untersucht die Studie drei konstitutionstheoretische Paradigmen der Forschung: den kognitiven Existenzialismus in naturwissenschaftlichen Forschungsprogrammen, die doppelte Hermeneutik in den Geisteswissenschaften und schließlich die Prototheorie in den interpretierenden Sozialwissenschaften.

Steps in Overcoming Scientism (Idea Publishing House, 2007)

In this book the steps of the hermeneutic critique of scientism are construed as steps in extending and reformulating Heidegger's existential conception of science.

The Context of Constitution. Beyond the Edge of Constitution (Boston Studies in the Philosophy of Science, Vol. 247), (Springer, 2006)

Whether philosophy of science is crucially tied down to epistemological justification is a significant topic of current debates. This book sets out an extensive argument against the foundationalist theories of justification. In developing a project of a hermeneutic context of constitution, it advocates new life for philosophy of science. At the present, there seems to be no middle ground between analytic approaches to scientific knowledge and hermeneutic conceptions of scientific research. In reacting to this situation, the author brings together aspects of the interpretative constitution of research objects and a holistic picture of science's cognitive structures. The book is conceived of as a contribution to a wide range of problems concerning the post-Gadamerian extension of philosophical hermeneutics beyond the scope of the traditional humanistic culture.

Entre Hermeneutique et Anthropologie (Peter Lang, 2004)

Entre l'ontologie herméneutique de Heidegger et l'anthropologie philosophique de Plessner se situe l'espace des possibilités de la pensée post-métaphysique. L'intérêt primordial des études recueillies dans la collection est cet espace de possibilités. Le point commun des recherches est ce que le mythe de l'émancipation ignore: la finitude et la *transcendance immanente* de l'expérience humaine. Le préfixe *post* se réfère non seulement à un mode spécialisé de philosopher comme métaphysique, mais plutôt à *l'identité métaphysique* de la modernité. L'herméneutique philosophique et l'anthropologie philosophique sont des discours pos-métaphysiques qui détiennent le potentiel critique nécessaire pour la réalisation d'une *identité post-métaphysique*.

Critique of Epistemological Reason (Bulgarian Academic Monographs, 2000)

Drawing on different versions of the constitutional analysis of meaning, this study addresses the search for new philosophical identities of science, political culture and art criticism. The book offers hermeneutic investigations of science's rationality, the dialogue which should take place in a multicultural public sphere, and the character of art criticism after the "end of art".

Essays in Hermeneutics of Science (Ashgate, 1997)

The essays in this book offer elaborations on the relationships between rhetoric and hermeneutic; naturalist and non-naturalist theories of culture; and transcendental pragmatics and hermeneutic philosophy.

A Passage to a Hermeneutic Philosophy of Science (Poznan Studies in the Philosophy of the Sciences and the Humanities, Vol. 53), (Rodopi, 1997)

In this book the author has brought together his long-standing interests in theory of scientific rationality and hermeneutic ontology by developing a hermeneutic alternative to analytic (and naturalist) epistemology of science. The “hermeneutic philosophy of science” is less the name of a new field of philosophical inquiry than a demand for a “repetition of the basic philosophical questions of science” from a hermeneutic point of view.

Die Mehrdimensionalität der geisteswissenschaftlichen Erfahrung (Blaue Eule, 1995)

Das Buch behandelt philosophisch wie wissenschaftstheoretisch grundlegende Fragen der hermeneutisch-phänomenologischen Fundierung geisteswissenschaftlicher Erfahrung. Es bietet in einem ersten Teil eine knappe Diskussion unterschiedlicher Antwortversuche, was eine Begründung dieser Erfahrung innerhalb einer Lebenswelttheorie sei. Der zweite Teil befasst sich mit der Möglichkeit der Konstituierung einer „existenzialen Kulturologie“.

Grundriß einer kritischen Wissenschaftstheorie (Peter Lang, 1989)

Der eigene Weg der transzendentalen Wissenschaftskritik erlaubt keine Berührungspunkte mit jedweder Wissenschaftstheorie naturalistischer Provenienz. Dieser Weg führt von einer Analyse der typologischen Pluralität wissenschaftlicher Erkenntnis über eine phänomenologische Analyse des wissenschaftlichen Bewußtseins zu einer Transzentalontologie, die die Grenzen der wissenschaftlichen Rationalität erschließt.
