

Senior Java Developer

Founded in 1996 in Magdeburg, today more than 5.500 employees work in the company in Germany, Austria and Bulgaria. regio.com is the largest full service provider in the field of energy and telecommunications in German and Austrian markets. We offer customer excellence through our employees and innovative solutions. In Bulgaria we have developed our business since 2006 and we are already successful in 4 Bulgarian cities – Sofia, Varna, Ruse and Veliko Tarnovo.

In Sofia and Varna we have concentrated on software development for leading energy companies.

For our IT department in Sofia we are looking for Senior Java Developer.

Your tasks:

- As a part of our team, you develop high-performance software solutions in an agile environment
- You support your team in all phases of the software lifecycle (conception, development, testing and documentation)
- You foster the architecture of our platform and the development process
- You advise our departments on the optimization and further development of software systems
- You assist the product owner in creating the backlog
- You stay up-to-date, you keep developing yourself and you share your knowledge with your colleagues

Your skills:

- You have at least 5 years of professional software development experience in the Java technology environment
- You have a university or college degree (computer science, technical, scientific) or comparable practical experience
- You have very good oral and written English and good communications skills of German
- You have very good knowledge of Jakarta EE, Spring, Apache Camel, Apache CXF, APIs and SQL
- You have in-depth knowledge of current web technologies such as HTML5, CSS3 or JavaScript
- You have experience with container platforms (Kubernetes, Docker)
- You have proficiency in markup languages like XML / XSD

What we offer:

- A pleasant, very collegial and technologically modern working environment
- Adequate and continuous personal development via external trainings and certifications
- Exciting projects in a dynamically growing market of the energy industry
