

Call for applicants in 2022 EATRIS-Plus Summer School in Personalised Medicine

We are pleased to announce that the 2022 EATRIS-Plus Summer School in Personalised Medicine will take place face-to-face on [May 23-26](#) in Lisbon, Portugal!

The overarching topic of the summer school is **personalised medicine with a focus on challenges and opportunities along the biomarker development pipeline**. Highlight will be on the best practices on biomarkers translation process into clinical practice. The four days comprise of lectures, interactive workshops and a roundtable.

The course targets primarily senior researchers and is expected to be attended by **30 participants** consisting of late-stage PhD students, Postdocs, researchers, academics, medical doctors, clinicians, and healthcare professionals interested in or working in the field of personalised medicine.

More information and application form can be found here on the [EATRIS-Plus Summer School event page](#).

We hope that you and your colleagues will be interested, please share this opportunity in your community and do not hesitate to apply!

The Summer School is held within the framework of [EATRIS-Plus Project](#), that is a 4-year H2020 funded flagship initiative in personalised medicine, coordinated by EATRIS ERIC. EATRIS-Plus Summer School is organised by project partners INFARMED – EATRIS Portugal, in collaboration with University of Ljubljana – EATRIS Slovenia.
