

# Digital Hub

Bring together the **experts in selected digital technologies** from the Luxembourg based EU Institutions

## Concept

Develop of a **hub of expertise** in emerging technologies for their use in the public sector

In close cooperation with the **external stakeholders** (notably, the Luxembourgish authorities, facilities and digital partners)

The systemic introduction and use of digital solutions is a **game changer** for the EU Institutions

The digital transformation of the public sector (and of the EU Institutions) passes through the

discovery, assessment, framing, implementation, and use of digital solutions

## A Game Changer

based on emerging technologies (artificial intelligence, business intelligence, process automation, blockchains, advanced data analytics, cloud computing, cybersecurity, ...)

Becoming "digital" means more than a technical undertaking, it means also **building the framework for the use of digital solutions** to address concrete use cases, evaluating and managing the **non-technical dimensions** (ethics, impact on humans, buy-in, productivity, activation of enablers) and seizing the opportunities

## Job Profiles

Professionals in Digital Policies, Digital Innovation, Cybersecurity, Artificial Intelligence, Emerging Technologies, Data, Digital Workplace, Networks, Information Systems, Access Management, Web Platforms, Digital Platforms, Software & Hardware Engineering
