### NOTE VERBALE

The China Atomic Energy Authority (CAEA) of the People's Republic of China Presents its compliments to the Embassy of the Republic of Bulgaria and has the honour to inform that the program of Atomic Energy Scholarship of China (AES Program), established within Harbin Engineering University (HEU), starts recruiting new students of the "Master's and Doctor's Degree Programmes in Nuclear Science and Technology".

The AES Program was jointly initiated by the CAEA together with the Ministry of Education of the People's Republic of China for the purpose of providing prospective nuclear engineers with technical expertise and skills required for a safe, secure and sustainable nuclear power programme in emerging nuclear power countries.

The HEU, internationally well-known for its strength in cultivating the next generation of professionals in nuclear science and application, is responsible for the AES Program. In 2019, the program had enrolled 34 students from 17 countries in Asia, Africa, North and South America. There are now 80 students in total studying under the program at HEU.

The program for 2020 will start on 1 September, 2020 and on-line application should be made no later than 15 April, 2020. The CAEA would heartily request the Embassy to convey this information to whoever might be interested. Candidates once admitted will be awarded a full scholarship and a valuable opportunity to get a master's/doctor's degree in nuclear science and technology.

The China Atomic Energy Authority avails itself of this opportunity to renew to the Republic of Bulgaria the assurance of its highest consideration.

Department of International Cooperation  
China Atomic Energy Authority  
March 31, 2020

To the Embassy of the Republic of Bulgaria
