

The background is a dark, abstract composition of numerous thin, overlapping lines in shades of yellow, orange, and purple. These lines radiate from various points, creating a sense of depth and movement. Interspersed among the lines are soft, out-of-focus circular bokeh lights in similar colors, adding a dreamy, ethereal quality to the overall design.

IBM ThinkHub Internship 2017

Open the Door to Opportunity in IBM

If you are searching for opportunities to start your career in the field of Global Technology Services and gain practical skills in a multinational environment, enroll for IBM Student Program.

Our 6-month part-time training program is aimed to prepare and develop students for a position in our Client Innovation Center.

Our trainees play unique and integral role in driving business decisions, supporting operations and influencing business results. You'll also experience opportunities for skills development training and leadership development.

You can be a trainee in one of the below areas:

- ✓ Business Support Trainee for Operations: ID 74002BR
- ✓ Business Support Trainee for Tools and Processes: ID 74005BR
- ✓ Quality and Workforce Management Trainee: ID 76885BR
- ✓ Global Data Analysis Trainee: ID 77001BR
- ✓ Network Support Trainee: ID 77468BR

Where?

The Client Innovation Center is the newest and largest IBM center in Sofia, Bulgaria. It is a hub of global importance for the company, providing end-to-end IT services, including network management, server systems operations, maintenance and monitoring of computer hardware and software covering some of the biggest world markets – US, Canada, Europe, Australia and New Zealand.

We hire your potential - no previous experience is required. If you like communication in international environment, you are a team player and you are looking for challenges to boost your future career development, then IBM is the right company for you.

Successful completion of the program will open the door for your further development and potential hiring. You will have the possibility to get insight into our key departments.

We require fluency in English, MS Office skills, excellent communication skills and willingness to learn and work in team.
