## GENERAL SCOPE

The Tenth Jubilee National Conference on Chemistry is organized under the motto '2019 International Year of the Periodic Table of Chemical Elements'. The main objective of the conference is to discuss research and innovation in all fields of chemistry related to smart, sustainable, and inclusive growth, with emphasis on the latest developments in chemistry and relation to health, clean energy, and environment. Multidisciplinary topics concerned with theoretical chemistry, chemical engineering, physics, earth and life sciences will be strongly encouraged. High-level scientific contributions including basic research and industrial applications will be particularly appreciated. Innovations in the chemicals sector will be supported that lead to the development of advanced materials (such as hybrid and lightweight materials, materials for tissue engineering, self-cleaning surfaces, and energy recovery and storage), and advanced process technologies that enable more flexible production with more efficient use of energy, feedstock, and water. Contributions to improved recycling and increased use of renewable feedstock will also be considered.

Papers on the following topics are invited: agrochemistry – fertilisers and pesticides; analytical chemistry; catalysis; ceramics and silicate chemistry; chemical engineering; chemistry education; computational chemistry and molecular modelling; electrochemistry; environmental protection; food chemistry, green energy, inorganic chemistry; management in chemical industries; mineral processing; natural products; nanomaterials; new materials; organic chemistry; organometallics chemistry; polymer chemistry and technology; petrochemistry; pharmaceuticals; physical chemistry; polymer chemistry and technology; pulp and paper technology; radiochemistry; solid state chemistry; supramolecular chemistry; textile and leather chemistry.

## SCIENTIFIC PROGRAMME

The programme of the conference will consist of invited lectures (40 min), keynote lectures (30 min), oral presentations (15 min), and posters. Flash oral presentations (5 min) of students' posters are optional. Keynote lectures and oral presentations will be organized in parallel sessions. Posters will be presented within 2-h poster sessions. Poster boards of w70×h90-cm size will be available.

## CONTRIBUTIONS

Selection of oral and poster presentations will be based on half-page (A4) abstracts. New methods, approaches, and applications will be encouraged. Contributions should comply with the scope of the conference. Submissions should be made online using the registration form available on the website: <http://10ncc.unionchem.org>. The reviewing process will be carried out online via the internet. After evaluation of the contributions, the programme will be made available on the conference website. By request of the authors, selected full-text papers of conference contributions will be published in a special issue of the journal Bulgarian Chemical Communications (<http://bcc.bas.bg>).
