

At PwC, the future
looks a lot like you.

Junior Consultants in Audit and Finance

Your training and role:

Join us and get a career in auditing with a steep learning curve, rapid career growth and a year-on-year salary increase.

Upon joining our intensive Workforce of the future program together with around 20 new joiners, you will embark onto a two-months training delivered by our best tutors to help you gain professional knowledge and develop your skills.

Your role - what you will be doing:

- Gain knowledge in various industries and business models
- Collaborate with different teams & clients on various projects
- Take part in developing an audit strategy and audit plans
- Communicate directly with the client and attend discussions with senior management and finance leaders
- Review companies' financial information, using our innovative auditing methodology
- Perform financial analysis, discover the story behind the numbers and use the latest technology such as (Alteryx, Power Bi, UiPath)
- Executing operational activities - gathering and processing evidence over the accuracy of financial information
- Learning new skills daily (strategic thinking, audit planning, project & time management)

Why should you join PwC?

- Access to global best practices and work in regional and international teams
- Working with some of the best professionals in the financial services industry with a world-class know-how who will continuously provide coaching
- Obtaining an internationally recognized professional qualification (ACCA), which will enhance your career development. Of course, all costs are covered by us, and sufficient study-leave time will be made available.
- Comprehensive remuneration and employee benefit programme including additional paid leave, additional medical insurance, food vouchers, sport card, performance bonus and fringe benefit
- Fast career growth and a steep learning curve
- Central office location & hybrid work model

What are your superpowers?

- Recent Graduate or just finishing-off your education in Finance, Accounting, Economics, or related disciplines
- Passionate about financial analysis and with excellent analytical skills (including the ability to interpret data and take actions based on data)
- Team player with a high level of integrity
- Agile in your thinking, adapt quickly to the changing world, and excited about working smarter through tech
- Basic accounting knowledge
- Excellent written and spoken English & Bulgarian
- Flexible about traveling around the country
