Summer of Solutions 2022: Praxis Lab for Sustainability

- + For several years, the **University of Bremen** has hosted an annual **Praxis Summer Camp** where international students team up to work on **real-life business challenges**
- + **2022, The Future Living** will support the Praxis Summer Camp in the field of **environmental sustainability**
- + Interested students can **choose among the projects** they would like to participate in, to help businesses and public institutions with the **transition towards environmental sustainability**
- + The developed solutions will be part of an ever-growing **knowledge base** for sustainable companies, allowing other organisations to fast-track their **sustainable transformation**

To learn more, join us on

21. April 2022 at 16:00 CET

About us

The Future Living

The Future Living builds digital processes and trainings that enable and structurally anchor employee driven change towards more environmental sustainability in organisations.

Through genuine involvement and influence, the expertise of employees can be used more effectively and their motivation and loyalty to the company can be increased.

The Future Living team consists of international and intercultural experts in Germany, Ireland and the UK and works together with freelancers and high-profile consultants. The projects are aimed at companies, educational institutions and municipalities and in most cases take place digitally.
