Sensata Technologies Holding N.V. (NYSE: ST), a global industrial technology company, is a leader in the development, manufacture and sale of sensors and controls. We produce a wide range of customized, innovative sensors and controls for mission critical applications that improve safety, efficiency and comfort for millions of people every day. You'll find our products in a wide array of automotive, appliance, aircraft, industrial, military, heavy vehicle, heating, air-conditioning, data, telecommunications, recreational vehicle and marine applications. Sensata employs approximately 14,500 people in 13 countries, with the headquarters in Attleboro, MA, U.S.

In Bulgaria Sensata operates from a Business Center in Sofia and manufacturing locations in Botevgrad and Plovdiv. The Business Center, with approximately 200 people, largely focuses on automotive OEMs customers with direct customer engagement via local Marketing, Product Design and Process Engineering, Purchasing, and Quality functions. Sensata also has supporting roles such as HR, Finance, Legal and IT.

Currently we have a position for EDI Specialist (Maternity Cover) who will work in our EDI /Electronic Data Interchange/ Department which manages the exchange of business data between Sensata and our clients such as GM, Volkswagen, Daimler, Fiat-Chrysler, etc.

The **electronic-based exchange** of documents allows businesses to benefit from reduced cost, increased processing speed, reduced errors and improved relationships with business partners. In order to do this they use a standard format which describes each piece of information in such a way that the computer understands it.

Electronic Data Interchange Specialist

Primary role: To analyze company's needs, gather users' requirements and translate them to technical requirements, monitor electronic transactions and alert when a problem arises, maintain documentation, communicate with clients and vendors.

Main tasks include:

- Gather requirements from end-users and convert them to system specific requirements;
- Analyze company's needs;
- Monitoring the electronic transactions daily;
- Create and maintain all EDI related documentation in accordance with EDI standards;
- Help in the research and resolving of EDI setups, data feeds and communication problems;
- Execute on application testing and EDI-related modifications.

Job requirements:

- BS in Computer Science, Information Technologies or similar, or a Business degree with keen insight on information technologies;
- Practical experience with electronic data interchange systems and operations;
- Knowledge of databases;
- Knowledge/experience with UNIX OS;
- Excellent English skills;
- Very good communicator via phone and face-to-face;
- Keen interest in the area of Electronic Data Interchange;
- Ability to work in a team;
- Problem-solving skills.
