

Feedback on the education in the
M. Sc. programme Computational Chemistry
 Faculty of Chemistry and Pharmacy, Sofia University “St. Kliment Ohridski”

<i>Student:</i>	Alexander Mehandjiiski
<i>Year of graduation:</i>	2012
<i>Place (University, PhD program) of continued education, if applicable:</i>	PhD programme at Norwegian University of Science and Technology (NTNU), Norway
<i>Present occupation (Place, position, and main responsibilities):</i>	University of Linköping, Sweden Post-doc in the area of organic electronics
<i>The education at the Faculty of Chemistry and Pharmacy contributed to:</i>	successful development in the field, which I chose and graduated in during the M. Sc. Programme
<i>The education in the M. Sc. program Computational Chemistry contributed to:</i>	My study in the master programme Computational Chemistry was very important for my subsequent development and provided me with excellent background for my PhD studies.
<i>Critical notes or recommendations to the education in the M. Sc. program:</i>	I can say that the education in the M. Sc. programme Computational Chemistry is at very high international level.
<i>Your wishes to the current and future students:</i>	I recommend them to be confident in their skills and assure them that the master programme will prepare them adequately for their following study/work.
<i>Please enclose a recent photo. 😊</i>
