## Rankings

### Step 4 of 4: Ranking

Economics

The ranking of universities is presented in a table and in a chart resembling a target. The university ranking highest appear at the top of the table and closest to the center of the *target*. Results are calculated on a scale from 0 to 100.

By choosing the option "*Compare selected*" you can receive detailed information on the performance of several selected universities in each of the indicators used in the ranking. You can select up to 10 universities listed in the table to make a detailed comparison among them.

A plus sign (+) in the upper left corner of the *target* indicates that the chart reflects the distance of the universities included in the ranking from the maximum result possible. A minus sign (-) in the upper left corner of the target indicates that the chart reflects the distance of the universities included in the ranking from the best performing university among them. The chart changes by clicking on the (+) or (-) sign.
